

Report Identification Number: NY-21-093

Prepared by: New York City Regional Office

Issue Date: Feb 07, 2022

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Presenting Information

The SCR report alleged on 8/21/21, the three-year-old female child was experiencing abdominal pain. At approximately 1:00 AM on 8/22/21, the child awoke and again she complained of abdominal pain. At approximately 2:00AM, the child experienced a new-onset-seizure. The parents sought medical attention at that time; the SC arrived at the hospital at approximately 2:30 AM. At 5:21 AM, the child died. She was an otherwise healthy child; the parents provided no explanation.

Executive Summary

This fatality report concerns the death of a three-year-old female subject (SC) who died on 8/22/21. As of the writing of this report, NYCRO had not received a copy of the final autopsy report from the ME. The death certificate stated the cause of death was pending further studies.

The SC resided out of NY state with her parents and 17-year-old sibling; however, at the time of the incident, the SC and her parents were in NY for a visit, while the surviving sibling remained at home with his grandparents as he was attending school. On 8/23/21, ACS assessed the surviving sibling via video and there were no concerns. The father has an adult daughter who does not reside with him.

According to ACS' case documentation, the family reported the SC was a healthy and happy child. The family went to the zoo on 8/21/21 and at about 5:30PM when they were leaving, the SC complained her feet were hurting. The mother carried the SC as they went to eat. At 8:30PM, the family arrived home and the SC complained of abdominal pain. She went to sleep and woke a few hours later complaining of same. The SC experienced what appeared to be a seizure while in the mother's arms and at that time the family decided to seek medical attention. The parents opted to drive to the closest ER where the SC was pronounced dead at 5:21AM.

Medical staff reported the SC suffered ventricular tachycardia that led to her demise. The ME reported no signs of trauma or abuse and that the SC appeared healthy and well cared for. LE found no criminality.

ACS interviewed multiple family members and there were no reported concerns.

On 11/15/21, ACS unsubstantiated all allegations of the SC by the parents citing a lack of credible evidence. The case was closed.

LDSS Response

Upon receipt of the SCR report, ACS initiated an investigation by contacting hospital staff, LE, ME, and the parents.

LE, the ME, and hospital staff found no indication of maltreatment or abuse.

The parents reported that at the time the SC experienced the first seizure in the home, they drove to the hospital. They said the SC asked for water and they went to the nearest store to purchase some. The parents said they attempted to give the SC the water and she experienced another seizure. They entered the ER at approximately 2:30AM, and while the mother was completing the paperwork, the SC's condition worsened. The parents said the child was admitted and according to the parents, the attending physician wanted to stabilize and transfer her to another hospital. However, the child died before she could be stabilized. The child was pronounced dead at 5:21AM.

The parents reported the SC had never experienced a seizure before, and she was never ill before her death. The SC received vaccinations until she was approximately five months old.

ACS conducted an assessment of the surviving sibling and documented the sibling was doing well in school, he is up to date with his immunizations, and his last medical exam occurred on 9/28/21. There were no medical concerns noted. At the time of the assessment, the surviving sibling was at home with the MGM and cousins; there were no reported concerns.

The parents denied mental health conditions, DV, or drug/alcohol use. At the time of the incident, they were visiting the PGM who told ACS she had no concerns; the parents were good parents who ensured the children's basic needs were met.

On 11/15/21, ACS unsubstantiated the DOA/Fatality and IG allegations of the SC by the parents citing a lack of credible evidence.
