

Report Identification Number: SV-19-046

Prepared by: New York State Office of Children & Family Services

Issue Date: Jan 27, 2020

This report, prepared pursuant to section 20(5) of the Social Services Law (SSL), concerns:

- A report made to the New York Statewide Central Register of Child Abuse and Maltreatment (SCR) involving the death of a child.
- The death of a child for whom child protective services has an open case.
- The death of a child whose care and custody or custody and guardianship has been transferred to an authorized agency.
- The death of a child for whom the local department of social services has an open preventive service case.

The Office of Children and Family Services (OCFS) is mandated by section 20 of the SSL to investigate or cause for the investigation of the cause and circumstances surrounding the death, review such investigation, and prepare and issue a fatality report in regard to the categories of deaths noted above involving a child, except where a local or regional fatality review team issues a report, as authorized by law.

Such report must include: the cause of death; the identification of child protective or other services provided or actions taken regard to such child and child’s family; any extraordinary or pertinent information concerning the circumstances of the child’s death; whether the child or the child’s family received assistance, care or services from the social services district prior to the child’s death; any action or further investigation undertaken by OCFS or the social services district since the child’s death; and as appropriate, recommendations for local or state administrative or policy changes.

This report contains no information that would identify the deceased child, his or her siblings, the parent, parents, or other persons legally responsible for the child, and any members of the deceased child’s household.

By statute, this report will be forwarded to the social services district, chief county executive officer, chairperson of the local legislative body of the county where the child died and the social services district that had legal custody of the child, if different. Notice of the issuance of this report will be sent to the Speaker of the Assembly and the Temporary President of the Senate of the State of New York.

This report may **only** be disclosed to the public by OCFS pursuant to section 20(5) of the SSL. **It may be released by OCFS only after OCFS has determined that such disclosure is not contrary to the best interests of the deceased child’s siblings or other children in the household.**

OCFS’ review included an examination of actions taken by individual caseworkers and supervisors within the social services district and agencies under contract with the social services district. The observations and recommendations contained in this report reflect OCFS’ assessment and the performance of these agencies.

Case Information

Report Type: Child Deceased
Age: 2 month(s)

Jurisdiction: Suffolk
Gender: Female

Date of Death: 09/14/2019
Initial Date OCFS Notified: 09/14/2019

Presenting Information

An SCR report alleged on 9/14/19, the mother gave the two-month-old child a bottle and then laid her down in her crib. At approximately 8:00 AM, the mother found the child in the crib not breathing and without a pulse. The mother started CPR and 911 was called. EMS arrived and took the child to the hospital where she was pronounced deceased. The parents did not have a plausible explanation for her death, therefore, the parents were considered alleged subjects. The role of the two-year-old sibling was unknown.

Executive Summary

This fatality report concerns the death of the two-month-old female subject child who died on 9/14/19. A report was made to the SCR concerning the death on the same day. The family did not have CPS history. There was a two-year-old surviving sibling who was assessed to be safe in the care of his family during the investigation.

Suffolk County Department of Social Services (SCDSS) immediately initiated the investigation. The medical examiner and District Attorney's offices were notified of the death. An autopsy was performed; however, the medical examiner's report was pending at the time of this writing. The criminal investigation remained open pending the autopsy results.

The parents reported the child acted normally the day prior to her death. The mother fed the child a bottle and together they laid down in the mother's bed. When the mother awoke around 7:30 AM, she found the child unresponsive and lifeless. She yelled to the father, 911 was called and CPR was performed. EMS arrived and transported the child to the hospital, where she was pronounced deceased at 8:30 AM.

SCDSS gathered information about the child's death from the parents, grandfather, law enforcement and medical providers. Collateral contacts did not have concerns for the care provided to the children. Home visits were made to the child's home as well as the grandparent's home. Both homes were assessed to be safe for the surviving sibling.

SCDSS completed required reports and Safety Assessments timely and accurately. The allegations of Inadequate Guardianship and DOA/Fatality were unsubstantiated against both parents regarding the child. The investigation did not reveal credible evidence the child's death was caused by any inaction or action by the parents. The family was offered an abundance of services which they accepted.

LDSS Response

On 9/14/19, SCDSS received an SCR report regarding the two-month-old child's death. Upon receipt of the SCR report, SCDSS immediately initiated their investigation by contacting law enforcement and the source of the report. Within the first 24 hours of the investigation, SCDSS obtained information from the hospital staff and searched for CPS history. The family did not have prior CPS involvement. Additionally, SCDSS conducted a home visit and assessed the safety of the sibling, who was visiting with his grandfather.

The parents were interviewed together at the hospital on 9/14/19. The parents explained the father would routinely care for the sibling while the mother cared for the child. On the day prior to the child's death, the mother put the child in her crib at 7:30 PM and sometime later the child awoke, and the mother laid down with the child on a couch. Between 11:00 PM-12:00 AM, the mother went upstairs with the child, fed her and at 12:30 AM, they laid down on the same mattress and fell asleep. The father said he slept in another room with the sibling. The mother woke up around 7:30 AM, and noticed the child was laying lifeless next to her. The mother found the child laying on her stomach. She screamed for the father and began CPR while the father called 911 until EMS arrived and took over life-saving measures. The child was transported to the hospital via ambulance where she was pronounced deceased.

On 9/14/19, SCDSS assessed the safety of the sibling at the grandparent's home. The grandfather expressed no concerns for the care the parents provided to their children. The sibling was observed to be comfortable in his grandfather's presence but was too young to be interviewed.

On 9/16/19, the parents were interviewed at the paternal grandparent's home. The family was staying at the grandparent's home as they did not want to return to their home. The parents said they were not provided safe sleep recommendations, and said sometimes they did co-sleep with the child, but it was not the norm. The father said he was in a group who advocated for co-sleeping as they believed it promoted bonding.

Information obtained from the pediatrician's office as well as the child's birth records noted the parents were provided step-by-step guidance on how to lay a baby down to sleep and medical staff provided the parents with safe sleep literature.

Law enforcement had no concerns regarding the home at the time of the fatal incident. Law enforcement reported the medical examiner found no signs of trauma to the child's body, and the criminal investigation would remain open pending the autopsy report.

The family was offered an abundance of services including funeral assistance, and bereavement and mental health counseling referrals. The parents accepted the services and were awaiting appointments at the time of case closure.
